1. Executive Summary

A. Overall Performance

Sales reached **1M** from **51K units** across **830 orders**, with **89 customers** spread across **21 countries**. The analysis highlights strong contributions from a few leading countries, while several regions remain underperforming.

B. Sales Trend

Yearly comparisons show higher sales in **2022 and 2023**, followed by a decline in **2024**. Peaks in April and November indicate seasonal demand patterns, but overall volatility suggests the need for closer monitoring.

2. Key Findings

A. Country Performance

The **USA (264K)**, **Germany (245K)**, and **Austria (139K)** are the top contributors, together accounting for nearly half of total sales volume. The **Top 5 countries by sales quantity** (USA, Germany, Austria, Brazil, France) dominate overall performance. Conversely, **Spain, Portugal, Argentina, Poland, and Norway** show minimal sales, highlighting weak market penetration.

B. Regional Trends

Yearly sales comparison reveals declining performance in major countries (USA, Germany, Austria) from 2022 to 2024. Moderate but consistent contributions are observed from Brazil and France.

C. City-Level Insights

Within the USA, **Boise (115K)** and **Albuquerque (52K)** stand out as strong hubs, while Seattle contributes moderately (29K). Germany and Austria also show significant city-level performance, reinforcing their importance in the overall sales mix.

3. Business Recommendations

A. Market Diversification

Reduce reliance on the top three countries by expanding into mid-tier markets such as Brazil, France, and the UK. Target weaker regions (Spain, Portugal, Argentina) with localized campaigns to improve sales penetration.

B. Regional Expansion

Leverage strong city hubs like Boise and Albuquerque as models for growth strategies in other regions. Explore opportunities in underperforming countries to balance declining European performance.

C. Customer Strategy

Strengthen customer engagement in high-volume countries to sustain growth. Introduce targeted promotions in low-performing regions to boost demand.

D. Continuous Monitoring

Use comparative dashboards to track **sales volume, sales quantity, and customer count by country**. Conduct monthly reviews to identify risks early and adjust strategies dynamically.
