1. Executive Summary

A. Overall Performance

Sales volume reached **1.35M**, with product performance spread across **8 categories**. Beverages (287K, 21%) and Dairy Products (251K, 19%) are the largest contributors, while Grains/Cereals (101K, 7%) and Produce (105K, 8%) remain weaker.

B. Sales Trend

Monthly sales quantity trends show fluctuations across 2022–2024, with a notable peak in **April 2024 (4.1K units)**. Year-over-year growth is strong, with total sales volume increasing by **178%** compared to the previous year.

2. Key Findings

A. Product Categories

Beverages and Dairy Products dominate overall sales, together contributing **40% of total volume**. Meat/Poultry and Confections also perform well (13% each), while Grains/Cereals and Produce underperform, suggesting untapped potential.

B. Product-Level Insights

Premium products such as **Raclette Courdavault (76K)** and **Camembert Pierrot (50K)** drive category performance in Dairy. Other products like Mozzarella di Giovanni (25K) contribute moderately, showing a mix of high and mid-tier performers.

C. Growth Analysis

Sales volume grew from **486K last year to 1.35M this year**, reflecting a **178% increase**. Growth is uneven across months, with stronger performance in late 2022 and early 2023, highlighting seasonal demand cycles.

D. Performance Distribution

The bubble chart shows clear differentiation between high-volume, high-quantity products and weaker performers. Green bubbles indicate strong product-market fit, while red bubbles highlight areas needing improvement.

3. Business Recommendations

A. Product Strategy

Focus on promoting high-margin categories (Beverages, Dairy) while designing campaigns to lift weaker categories (Grains/Cereals, Produce).

B. Growth Optimization

Capitalize on seasonal peaks (April, November) with targeted promotions and inventory planning to sustain momentum.

C. Product Development

Expand offerings in mid-performing categories (Confections, Seafood) to diversify revenue streams and reduce reliance on top categories.

D. Continuous Monitoring

Use dashboards to track **category contribution %, product-level growth, and monthly sales trends**. Regular reviews will help identify emerging products and adjust strategies quickly.
